

# Midstream Training Qualifications (MSTQ)

**SAFeworld**

SAFETY FOR PEOPLE AND PLACES

## Course Overview

Midstream Training Qualifications (MSTQ) is a set of training requirements, requested by and designed for PEC members of the midstream industry, comprised of core training, non-core training and hands-on training requirements. Currently offered as a supplement or a stand-alone, the MSTQ Module, in addition with SafeLandUSA, satisfies the awareness level core training requirements. Additionally, the non-core training and hands-on training will soon be phased into this course.

## Course Content

The following are the PEC H2S Clear course topics covered in this

- |                                     |   |

### Target Audience

Entry level workers, and management, working in the Oil and Gas Midstream Industry. Taken with SafeLandUSA, MSTQ enables contractors and sub-contractors to satisfy the requested MSTQ Core Training Requirements.

### Prerequisite

**SafeLandUSA** – prior to (or in addition to) the MSTQ Module. If completed within the last year, prerequisite requirements are satisfied.

To check the date of your SafeLandUSA credential, visit [www.peccard.com](http://www.peccard.com).

### Completion Time

3-4 Hours

### Certificates

PEC ID card with student picture, bar code, and completed courses.
